Cardinal’s Luthierthane 6779-CLE20902 is solventborne high build polyurethane sealer designed specifically for the fine musical instrument finishes. This product exhibits a high degree of toughness; ease of application, fast dry, cold checking resistance, long potlife and outstanding buffing properties that result in beautiful clear glossy finishes.

**Typical Uses:**
- Fine musical instruments

**Benefits:**
- Toughness
- Cold Checking resistance
- High build, filling properties
- Sandability

**Cured Film Properties:**
Testing was conducted on a variety of different wood types which had been sealer with 6779-CLE20902. This product was air dried for seven days before testing.

**Application:**
If desired seal with Vinyl Sealer and fill with 4760 or FE02 high build filler spray

1. Seal the wood using Cardinal’s 6779-CLE20902 urethane isolante sealer/filler.
2. Scuff sealer lightly with 200 to 400 grit sandpaper if recoating after 24 hours. Apply 2-3 coats to ensure flat surface.
3. Apply finish with a fine finish spray gun setup using the necessary amount of atomizing air pressure to form a fine spray.
4. Recommended spray gun settings would be 6” fan approximately 9”-12” from the substrate.
5. Apply the finish with an overlapping spray technique two times for one coat. Avoid getting the gun to close to substrate to prevent air entrapment (bubbles)
6. Apply approximately 2-3 dry mils (5-10 wet mils) each coat.
7. Two to three coats recommended. Allow seven days air dry under standard conditions to fully harden.

**Final Finish:**
1. Once the coat has been air dried for seven days the surface needs to be preconditioned for buffing.
2. Sand the finish with a variety of different fine grit sand papers removing any blemish or contaminant. Start with 600, and then work up the final wet sand of 1000-2000.
3. Buff the finish using a variety of fine finish wheels with the Mezerna 16-18 buffing compound. The speed on the wheel should be between 750-1000 rpm.
4. For final finish use a fine polishing cloth with a water based polish compound.

**Note:**
These recommendations are only a suggestion and do not imply that other products and techniques currently being used won’t work. All procedures and materials used must be tested and approved by the applicator.

**Type:** Acrylic Modified Polyurethane.

**Components:** Two.

**Colors:** Clear

**Gloss:** High

**Minimum Order:** 1 gal of 6779-CLE20902.

**Coverage:** At 1.0 mil DFT, 65% transfer efficiency(TE)
1 is 250 ft²/gal.
Calculation: 1604 ft²/gal x % volume solids x DFT

**VOC Mixed:** 688 grams/liter = 5.68 lbs/gal minimum.

**Viscosity:** 20-25 seconds in Zahn 2

**Spray-able Pot Life:** 8 hours @ 78°F, 50% RH

**Recommended DFT:** 2.0 – 3.0 mils
(depending on required finish)

**Cure:**
- Air Dry
  - Tack free 10 min.
  - Dry to handle 30 min.
  - Dry hard 24 hours.
  (At 1.0 mils dry film thickness, 78°F, 50% RH)

This coating must be used only in a well ventilated area!

Keep this coating away from any and all sources of ignition!

(Continued on page 2)
SURFACE PREPARATION AND SEALING: The most important steps in a successful coating process are cleaning and sealing. The woods surface should be free of any dust or dirt before application of sealer. If a pore filler is being used the the
Cleaning the substrate: The surface of wood should be cleaned with either acetone or Mineral spirits to remove any oils, grease or other contaminants. The surface must be thoroughly dry before painting. Air quality regulations have limited the allowable emissions from cleaning operations.

Plastic — Any vinyl or other plastic products that might be coated over with this finish should have the adhesion verified before use.

APPLICATION EQUIPMENT: Most air quality regulations require the paint application transfer efficiency to be 65% or better. This generally means using electrostatic or high volume low pressure (HVLP) spray guns. Otherwise, conventional pressure feed, airless or air assisted airless spray equipment can be used. Air supply lines need water and oil traps.

EQUIPMENT CLEAN-UP: Clean up should be done as soon as possible keeping in mind the pot life of the mixed paint. Air quality regulations have limited the allowable emissions from cleaning operations.

PRODUCT LIMITATIONS:
- This 6779-CLE19661 was design for fine musical instrument and the normal environmental condition that they would be exposed. All precautions should be taken to avoid extreme conditions such as: excessive heat, extended cold temperatures, chemicals which would damage coating or excessive abrading with guitars strap and other abrasive objects.

SAFETY: Refer to the product’s Material Safety Data Sheet (MSDS) for complete safety information. Contains organic solvents. Use with adequate ventilation. Do not breathe vapors or spray mists. If component TLVs are exceeded, a NIOSH approved air supplied respirator is advised. See MSDS for TLV information.

Sensitization reactions are possible. Avoid use by persons with respiratory problems. Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling.

FIRST AID:
- Eye contact: flush immediately with plenty of water for at least 15 min. and get medical attention.
- Skin contact: wash thoroughly with soap and water for 5 minutes.
- If swallowed, do not induce vomiting and get medical attention immediately.
