Cardinal’s U4UA-CLE15-6 is a solventborne UV curable urethane acrylate satin finish. This product exhibits a smooth satin finishes, reduced burnishing resistance, ease of application, fast tack time and good cure speed.

**TYPICAL USES:**
- Fine musical instruments

**BENEFITS:**
- Fine Satin Finish
- Fast Tack Time
- Burnish Resistance
- Ease of Application

**CURED FILM PROPERTIES:**
Testing was conducted on a variety of different wood types which had been sealer and basecoated with U4PA-CLE22 and topcoated with U4UA-CLE15-6.

**APPLICATION:**

**Spray**
1. Prepare basecoat of gloss clear to accept satin finish by sand with 600-800 grit sand paper.
2. Apply finish with a fine finish spray gun setup using the necessary amount of atomizing air pressure to form a fine spray.
3. Recommended spray gun settings would be 6” fan approximately 9”-12” from the substrate.
4. Apply the finish with an overlapping spray technique two times for one coat. Avoid getting the gun to close to substrate to prevent air entrapment (bubbles)
5. Apply approximately 0.75-1.0 dry mils (5-10 wet mils).
6. Allow to flash for 10 minutes before UV curing.
7. Depending on Light intensity cure the finish following the cure conditions listed.
8. Once cured the finish is complete.

**REPAIR: IN DEVELOPMENT.**

**Note:**
These recommendations are only a suggestion and do not imply that other products and techniques currently being used won’t work. All procedures and materials used must be tested and approved by the applicator.

**TYPE:** Solventborne UV Urethane Acrylate

**COMPONENTS:** One

**COLORS:** Clear

**GLOSS:** Semi Gloss 15-18°

**MINIMUM ORDER:** 1 gal. of U4UA-CLE15-6.

**COVERAGE:** At 1.0 mil DFT, 65% transfer efficiency (TE) is 223 ft²/gal.
Calculation: 1604 ft²/gal x % volume solids x TE ÷ DFT

**VOC MIXED:** 472 grams/liter = 3.93 lbs/gal excluding.
208 grams/liter = 1.73 lbs/gal including.

**SOLIDS:**
Weight …………………… 25%
Volume …………………… 20%

**VISCOITY:** 18-20 seconds in Zahn #2

**SPLAY-able Pot Life:** NA

**RECOMMENDED DFT:** 0.75 – 1.0 mils (depending on required finish)

**CURE:** Air Dry
Tack free 3 min.
Time to Cure 10 min.
Cure conditions: 2 minutes
UV 3.18 J
UVB 1.80 J
(At 1.0 mils dry film thickness, 78° F, 50% RH)

This coating must be used only in a well ventilated area!

Keep this coating away from any and all sources of ignition!

(Continued on page 2)
SURFACE PREPARATION AND SEALING: The most important steps in a successful coating process are cleaning and sealing. The wood's surface should be free of any dust or dirt before application of sealer. If a pore filler is being used the surface should be cleaned, sanded and sealed before applying U4UA-CLE15 or other Cardinal recommended product.

Cleaning the substrate: The surface of wood should be cleaned with either acetone or mineral spirits to remove any oils, grease or other contaminants. The surface must be thoroughly dry before painting. Air quality regulations have limited the allowable emissions from cleaning operations.

Plastic — Any vinyl or other plastic products that might be coated over with this finish should have the adhesion verified before use.

**APPLICATION EQUIPMENT:** Most air quality regulations require the paint application transfer efficiency to be 65% or better. This generally means using electrostatic or high volume low pressure (HVLP) spray guns. Otherwise, conventional pressure feed, airless or air assisted airless spray equipment can be used. Air supply lines need water and oil traps.

**EQUIPMENT CLEAN-UP:** Clean up should be done as soon as possible keeping in mind the pot life of the mixed paint. Air quality regulations have limited the allowable emissions from cleaning operations.

**PRODUCT LIMITATIONS:**

- This U4UA-CLE15 was design for fine musical instrument and the normal environmental condition that they would be exposed. All precautions should be taken to avoid extreme conditions such as: excessive heart, extended cold temperatures, chemicals which would damage coating or excessive abrading with guitars strap and other abrasive objects.

**SAFETY:** Refer to the product’s Safety Data Sheet (SDS) for complete safety information. Contains organic solvents. Use with adequate ventilation. Do not breathe vapors or spray mists. If component TLVs are exceeded, a NIOSH approved air supplied respirator is advised. See SDS for TLV information. Contents are FLAMMABLE. Keep from heat, sparks or open flame. Allergic reactions are possible. Avoid use by persons with respiratory problems. Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling.

**FIRST AID:**

Eye contact: flush immediately with plenty of water for at least 15 min. and get medical attention. Skin contact: wash thoroughly with soap and water for 5 min. If swallowed, do not induce vomiting and get medical attention immediately.
